

Why Implement ISO 9001:2008 QMS

Following are the aspects the organization must take into account, when choosing a certification body.

- The best reason for wanting to implement the standards is to improve the efficiency and effectiveness of company operations.
- Deciding to have an independent audit of the system to confirm that it conforms to ISO 9001:2008 QMS.

This Decision to be taken on following business grounds:

For example:

- If it is a contractual or regulatory requirement.
- If it is a market requirement or to meet customer preferences.
- If it falls within the context of a risk management program.
- Or if the organization thinks it will motivate staff by setting a clear goal for the development of its management system.
